OBJECTIVE

A solutions-oriented professional who thrives in situations that require creative problem solving. Seeking a web developer or adjacent position in an organization that supports professional growth and provides challenges to learn from.

EXPERIENCE

Livability Initiative, Richmond, VA — Lead Full Stack Web Developer and IT Administrator (Part-Time)

June 2023 - PRESENT

- Assumed the role of sole developer on three existing web projects
- Managed deployment and maintenance of live site, including configuring staging, continuous integration, bug fixing, and email routing
- Develop best practices and protocols as organization's first web developer with an eye for extensibility and growth

Choose-U, Remote — Full Stack Web Development Lead Instructor

November 2020 - August 2023

- Oversee the development of dozens of full stack applications from wireframe to containerizing and deployment
- Create material using core Full Stack developer technologies like HTML, CSS, JavaScript, SQL, and Java
- Write clean and easy to read code
- Debug learner's code
- Lead a team of 5 to teach a classroom of up to 120 learners everyday
- Learn novel programming and web development concepts independently in preparation to teach the topics as needed

EDUCATION

Kenyon College, Gambier, OH — B.A. Philosophy, Neuroscience

August 2015 - May 2020

- Completed course of study for both the Philosophy and Neuroscience majors
- Worked in two neuroscience labs writing MatLab code for research paradigms
- Excelled in symbolic logic and ethics
